FOR IMMEDIATE RELEASE

Deltacom Introduces Online Faxing and Web Hosting Solutions

Deltacom Enables Business Customers in the Southeastern United States with Additional Value Added Communications Services

Huntsville, Ala., May 6, 2010 – ITC^DeltaCom, Inc. (OTC: ITC.D.OB), a leading provider of integrated communications services to customers in the southeastern United States, today announced it has introduced online faxing and web hosting services to complement its extensive portfolio of integrated access, data and Internet services.

Deltacom's online faxing allows users to send and receive faxes via an online portal, accessible from any Internet connection. As a user of Deltacom's online faxing service, customers can enhance document management and further green initiatives, eliminating the need for fax machines, fax lines, printed faxes and paper storage files for inbound and outbound fax documents.

Deltacom's web hosting service helps businesses increase their web presence with packages that provide varying degrees of support, ranging from simple implementation of Internet presence with lead generation to complete e-commerce capabilities.

"Deltacom has a long history providing enhanced communications solutions that meet our customer's needs, and we continue to enhance our portfolio to support their evolving business objectives," said Tony Tomae, Executive Vice President of Sales and Marketing. "Deltacom's full service web hosting packages help customers achieve revenue growth by establishing or enhancing their Internet presence with little investment in technical resources. Additionally, online faxing provides businesses with improved operational efficiencies through enhanced document management while also offering a green alternative to printed fax and file systems."

ABOUT ITC^DELTACOM, INC.

ITC^DeltaCom, Inc., headquartered in Huntsville, Alabama, provides, through its operating subsidiaries, integrated telecommunications and technology services to businesses and other communications providers in the southeastern United States. ITC^DeltaCom has a fiber optic network spanning approximately 12,161 route miles, and offers a comprehensive suite of voice and data communications services, including local, long distance, broadband data, Internet connectivity, wireless voice and data services, and customer premise equipment.
